**Subject: Tigo Product Compatibility with CPS Inverters**

CPS America has conducted testing and validated the effective compatibility and performance of CPS 50 and 60kW 3 phase string inverters in combination with Tigo TS4-A-F/TS4-F products manufactured after 08/01/2019 (version 6.7 or later). The CPS America standard warranty will remain valid for these inverter products.

CPS does not warrant performance of our 3 phase string product line with Tigo TS4-A-F/TS4-F products produced prior to 08/01/2019 (version 6.6 or earlier) or other Tigo products, including but not limited to -D, -M, -S, -O or -L models. Customers using these products in conjunction with CPS 3 phase string inverters are advised to contact Tigo for any support related topics.

This letter supersedes any previous communication from CPS or Tigo related to compatibility. Contact the CPS Support Hotline at 855-584-7168 with any questions regarding CPS products and compatibility.
