

20% Price Cut on 350kW 3 phase string inverter and 5MWh Battery Container Products Announced at 3rd Annual Product Innovation Day!

CPS America, a leading provider of solar and energy storage solutions, is thrilled to announce a significant milestone in its commitment to advancing renewable energy technologies. At the highly anticipated 3rd Annual Product Innovation Day, CPS America unveiled a 20% price reduction on its 350kW 3-phase string inverter as well as 5MWh Battery Container products.

Bryan Wagner, President and General Manager of CPS America, expressed his excitement about the company's latest offerings: "We are delighted to introduce these innovative solutions that empower our customers to build high-powered sites with flexibility, efficiency, and long-term reliability in mind. At CPS America, we are committed to driving positive change in the renewable energy sector, and these price reductions underscore our dedication to making sustainable energy solutions more accessible than ever before."

The 5MWh Battery Container, hailed as a game-changer in the energy storage landscape, boasts unprecedented high energy density, marking it as the first of its kind in the market. Zhehan Yi, Utility & ESS Product Solutions Director at CPS America, commented on this groundbreaking achievement, stating, "Our 5MWh Battery Container represents a paradigm shift in energy storage technology. With its industry-leading energy density, it offers unmatched performance and versatility, setting a new standard for the market."

Anton Patton, Senior Product Management & Applications Engineering Director at CPS America, emphasized the significance of the high-energy density solution for 1,500-VDC applications. "Having a high-energy density solution available for 1,500-VDC applications allows site owners to invest in the future of their solar projects," said Patton. "Granularity, efficiency, and ease of serviceability are all baked into the product, allowing for systems to minimize downtimes and maximize revenue through energy harvest."

The 20% price reduction on CPS America's 350kW 3-phase string inverter and 5MWh Battery Container products represents a significant milestone in the company's mission to accelerate the global transition to renewable energy. With these innovative solutions now more affordable and accessible, CPS America continues to lead the way in driving sustainable energy adoption worldwide.
