

CPS America Expands Operations into LATAM, Positioning Itself as a Leader in Clean Energy Across North and South America

Leading the charge in clean energy solutions, CPS America is excited to announce the expansion of its operations into the Latin American (LATAM) market. This move is a strategic step to strengthen its position as a dominant force in both North and South America, aiming to provide innovative, clean, and renewable energy solutions that will help empower communities and accelerate the transition to clean energy across the region.

As part of this expansion, CPS America will leverage its years of success in the North American market, offering a robust portfolio of products tailored to the specific needs of LATAM's diverse energy landscape. The company is committed to enabling the region's transition to renewable energy sources through cutting-edge solar inverters and energy storage solutions that ensure sustainable and reliable energy access for residential, commercial, and industrial sectors.

Bryan Wagner, President & General Manager of CPS America, emphasized the company's strategy: *"At CPS America, we've seen tremendous success in the North American market, and we're now applying those lessons learned to help drive the clean energy transition in LATAM. By bringing our advanced solar and energy storage technologies to this region, we are excited to not only help power homes and businesses but also create a more sustainable future for our South American partners."*

CPS America's expansion into LATAM comes at a critical time as many countries in the region are prioritizing clean energy to address energy security challenges and environmental sustainability goals. With a diverse and growing energy demand, the LATAM market is seeking reliable, cost-effective solutions to harness renewable energy on a large scale.

Carlos Abad, Associate Director of Sales, LATAM, expressed confidence in the market potential: *"The LATAM market has long needed reliable solutions to generate clean, renewable energy. Our product portfolio is perfectly positioned to meet this demand, empowering local communities and accelerating the transition to sustainable energy sources. With CPS America's industry-leading technologies, we are ready to support LATAM's energy transformation and help propel the region into a cleaner, greener future."*

CPS America's expanded operations in LATAM will focus on building strong partnerships with local stakeholders and providing tailored solutions that address the region's specific energy needs. The company is committed to fostering long-term relationships with its partners and customers to help ensure the continued growth and success of clean energy initiatives throughout Latin America.
